

# GREENHOUSE HEATING WITH WOOD WASTE

## Introducing the MAX OX™

- HOT WATER BOILER
- 900,000 BTU heat output
- Rated fuels: wood chips < 1.5", Briquettes < 2" diameter x 1" length, wood shavings, construction/demolition waste (C/D) < 1.5"
- Automatic ash removal - standard
- Cyclone processing removes particulate from the exhaust stream
- Combustion chamber is poured refractory to handle the high temperatures
- Primary and secondary combustion air creating gasification effect eliminating smoke emissions
- Measured combustion efficiency @ 83%
